

**Objective and Strategy**

The objective of the Stable Value Fund (“Fund”) is to preserve your principal investment and generate a stable rate of return. The Fund pursues its objective by investing primarily in a diversified portfolio of fixed-income instruments which may include traditional guaranteed investment contracts (“GICs”) (obligations of creditworthy life insurance companies), separate account GICs, synthetic GICs (high-quality debt securities including mortgagebacked, commercial mortgage-backed, asset-backed and corporate securities held by the Fund within contracts that are intended to minimize market volatility), variable rate GICs, repurchase agreements, US treasury and agency securities, and cash and cash equivalents, including certificates of deposit and money market instruments. The Fund may also invest in a collective fund or group trust (including but not limited to one maintained by the account’s/fund’s investment manager or its affiliate) that invests in such fixed income instruments, and the terms of such collective fund or group trust are hereby incorporated by reference in the Fund and shall be part of the Fund. A portion of the Fund may be invested in one or more money market funds. Such an investment may include units of a fixed income fund that are held by the Fund as part of a synthetic GIC.

**Who should invest?**

- Investors seeking interest income and little fluctuation in share price.
- Investors seeking to preserve capital and maintain liquidity.

**Fund Information**

Category	Stable Value
Benchmark	Custom**
